PROFESSIONAL SUMMARY

AI-focused Full Stack Developer with expertise in developing AI agent applications, prompt engineering, and enterprise integration using Claude and Anthropic tools. Proficient in building Claude-powered applications with hands-on experience in prompt optimization, AI agent architecture, and full-stack web development. Strong background in Java, Python, JavaScript, and modern web frameworks. Passionate about implementing agentic systems and leveraging LLMs for business solutions.

TECHNICAL SKILLS

AI & LLM Expertise

- Anthropic AI Agents: Hands-on experience with Anthropic AI Agent frameworks and concepts
- Claude Integration: Proficient with Claude (multiple versions) for AI-powered application development
- Prompt Engineering: Expert in crafting and optimizing prompts for diverse AI tasks and use cases
- Agentic Systems: Understanding of agentic engineering concepts, autonomous agents, and agent design patterns
- AI Tools & Platforms: Streamlit, Jupyter Notebooks, GenAI APIs, LLM orchestration
- Generative AI: Certified in Generative AI fundamentals; hands-on with text generation, image analysis, and multi-modal AI

Programming Languages

Java (Core), Python, JavaScript, PHP

Web Development

Frontend: HTML5, CSS3, JavaScript, React.js, Bootstrap | Backend: Node.js, Flask, PHP

Databases & Tools

MySQL | Git, GitHub, VS Code, Visual Studio, XAMPP

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern – Smackcoders Inc.

Dec 2025 – April 2026 | Tirunelveli, Tamil Nadu

- Developing full-stack web applications with focus on scalability and performance. Building responsive user interfaces and optimizing front-end architecture
- Implementing backend services using Node.js, Express.js, and REST APIs
- Collaborating with team using Git workflows and agile development practices

EDUCATION

Manonmaniam Sundaranar University, Tirunelveli

Post Graduate Degree in Computer Science | 2024 - 2026 | Grade: A+

Ayya Nadar Janaki Ammal College, Sivakasi

Bachelor of Computer Science (Madurai Kamaraj University) | 2021 - 2024 | CGPA: 7.8

PROJECTS

1. Placement Training App (Generative AI Powered)

Technologies: Python, Streamlit, Claude API, LLMs

- Developed multi-module AI application leveraging Claude for intelligent task automation
- Cube Module: AI-powered programming assistant using prompt engineering to answer technical queries
- Pixel Module: Image analysis and comparison using vision-capable AI models
- Solver Module: Math and programming problem solver with step-by-step explanation
- ATS Tracker: Resume evaluation system using prompt engineering to analyze candidate-job alignment.

2. An Online Fireworks E-Commerce Website

Technologies: PHP, MySQL, HTML, CSS, JavaScript

- Full-stack e-commerce platform with user authentication and product management
- Implemented secure database interactions and responsive design

3. Premises Maintenance Detection System

Technologies: Python, Streamlit, TensorFlow, Keras

- AI-based image classifier using deep learning for automated maintenance assessment
- User-friendly Streamlit interface for real-time predictions

4. SignTalk Communication (Gesture Recognition)

Technologies: Python, OpenCV, MediaPipe, TensorFlow

- Real-time gesture recognition system converting sign language to text/speech
- Accessibility-focused AI application for hearing-impaired communication

5. Flask-Based Hotel Management System

Technologies: Python, Flask, MySQL, HTML, CSS

- Scalable backend service with CRUD operations and database management
- Real-time booking and availability management system

CERTIFICATIONS & TRAINING

- ✓ Claude 101 & AI Fluency – Anthropic (Completed)
- ✓ MongoDB (Basics)- Completed
- ✓ Full Stack Development (HTML, CSS, JavaScript, MySQL, PHP) – June-Sep 2025
- ✓ Advanced Java Programming – Jan-May 2023
- ✓ Software Testing Certification – Jan-June 2022

ACHIEVEMENTS & LEADERSHIP

- ✓ Delivered computer training to 20+ government library staff on modern development practices
- ✓ Intercollege Competition Certificates: Debugging & Web Development
- ✓ Event Organization: Led technical events promoting AI and development awareness
- ✓ Prompt Engineering: Proficient in designing optimal prompts for diverse AI tasks
- ✓ Full Stack Development: Proven capability in both frontend and backend development
- ✓ Enterprise Ready: Experience with scalable architectures and software engineering best practices
